Do I need a web site?

No, you do not need your own web site. Just send your clients to the login page at www.StopMyBills.com.

What if I already have a web site?

The client login option can be integrated with your web site so that instead of providing your clients with the above URL, you can give them the URL of your own site. Use the following HTML code to add a Rapid Import login button on your site:

```
<form action="https://www.rapidimport.com/cgi-bin/webinput.pl" method="post">
<input type="hidden" name="atty" value="YOURLOGIN" />
SSN: <input type="text" name="ssn1" size="3" maxlength="3" />-
<input type="text" name="ssn2" size="2" maxlength="2" />-
<input type="text" name="ssn3" size="4" maxlength="4" />
<input type="submit" value="Log In" />
</form>
```

You can also go a step further and customize the layout of the questionnaire so that it appears as a fully integrated part of your own site. Additional steps are required for complete integration so we recommend contracting the work out to an experienced web developer.

Where can I get a web site?

If you do not already have a web site, we would be happy to put you in touch with developers who specialize in site development solutions for attorneys and Rapid Import integrations. For more information, call 1-800-603-7858.
